The **Spine Therapy Network** presents

SPINE THERAPY SYMPOSIUM

FEB 19 2016 ● TORONTO WESTERN HOSPITAL

MEDICAL, SURGICAL and REHABILITATION THERAPY for the SPINE PATIENT

This symposium brings together the key spinal disciplines of **orthopaedics**, **neurosurgery**, **neurology**, **rheumatology**, **oncology** and **rehabilitation** to present a unique perspective in cross-disciplinary diagnosis and collaborative best practices in conservative and non-conservative options for treatment of the spine patient.

SYMPOSIUM PERSPECTIVE

BMO LEARNING CENTRE, 60 LEONARD AVE., TORONTO, ON

This **Spine Therapy Network** symposium recognizes that different areas of expertise are required to address the full needs of the spinal patient. The practitioner working with back pain must consider a multitude of possible diagnoses to determine the best approach for treatment and to determine if further investigations are required.

This program brings together the key spinal disciplines of **orthopaedics, neurosurgery, neurology, rheumatology, oncology** and **rehabilitation** to look at how they overlap, differential diagnosis and what can be learned and applied from each discipline to maximize outcomes for the spine patient.

The presentations provide a unique perspective by pairing a medical/surgical practitioner with a recognized leader in therapy to cover the range of diagnoses and best practices in conservative and non-conservative options for treatment.

What to Expect:

- review of the diagnostic features of each category
- key considerations for differential diagnosis
- indicators for imaging or further testing
- rehabilitation consideration, options and best practices.

Who Should Attend?

- practitioners working in spinal therapy or those who are looking to deepen their knowledge of spinal conditions and rehabilitation choices
- physicians, physiotherapists, kinesiologists, massage therapists, chiropractors and other practitioners involved or interested in spinal diagnosis and treatment options
- practitioners interested in building connections between treating practitioners and the diagnostic, medical and surgical spine community.

INAUGURAL EDUCATIONAL MEETING

BMO LEARNING CENTRE, 60 LEONARD AVE., TORONTO, ON

TIME	TOPIC	PRESENTER
7:30 - 8:30	REGISTRATION AND CONTINENTAL BREAKFAST - BMO LEARNING CENTRE LOBBY
